DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Timothy J. Lane on November 15, 2007.

The application has been amended as follows:

Paragraph [0025] "Fig. 9 is a graph illustrating a change in contrast value in response to modification of a gradient."
has been amended to read "Figs. 9A-9D are graphs illustrating changes in contrast values in response to modification of a gradient."

Allowable Subject Matter

2. The following is an examiner's statement of reason for allowance.

Claims 1-6 are allowable because applicant presents remark/argument on September 4, 2007 is persuasive.

With regard to claim 1, it is drawn to a method of setting tonal gradation conversion characteristics applied to an image in an image processing apparatus that processes the image displayed on a display unit. Claim 1 claims "a method for

processing images to adjust for tonal degradation characteristics for a display device, the method comprising: receiving a plurality of test pattern images; varying a gradient of one of the plurality of test pattern images to adjust its contrast; automatically varying gradients of other non-selected test pattern images to adjust their contrasts, wherein said variation of gradients is equally shared among the non-selected test pattern images; repeating the varying and automatic varying steps until all test pattern images meet a predefined criteria; and generating a LUT (look-up table) associated with the plurality of test pattern images based on determined variation in gradients.”

Claims 2-6 are dependent claims of claim 1.

The closest prior arts in the record are Nakane et al (Nakane) (US 5,461,462), Yip (US 5 369 499) and Takamatsu et al (Takamatsu) (US 6,044,204). Either by Nakane et al, Yip or Takamatsu et al individually, or combined Nakane with Yip and Takamatsu do not teach or suggest the above claimed limitation. Therefore, claims 1-6 are allowable.
